JOURNAL OF APPLIED GEOPHYSICS

Contents Volume 35, 1996

Research papers

Reflection tomography versus stacking velocity analysis
G. Boehm, J.M. Carcione and A. Vesnaver 1

Electromagnetic survey of a Celtic tumulus
A.I.M. Fröhlich Gugler and P. Gex 15

2.5-D gravity model of the Ni–Cu–PGM mineralized Mount Ayliff Intrusion (Insizwa Complex), South Africa
B.K. Sander and R.G. Cawthorn 27

Interwell seismic logging for formation continuity at the Gypsy test site, Oklahoma
J.O. Parra, B.J. Zook and H.A. Collier 45

Analytical solution for direct current electrical potentials in an arbitrarily anisotropic half-space
U.C. Das and P. Li 63

Anticlines and synclines with hyperbolic density contrast and their gravity inversion
C. Visweswara Rao and M.L. Raju 69

Special Issue

RECENT ADVANCES IN EXPLORATION GEOPHYSICS

edited by K. SASSA and T. ULRYCH

Preface 77

Interface waves propagated along a fracture
L.J. Pyrak-Nolte, S. Roy and B.L. Mullenbach 79

Data processing of reflection seismic data by use of neural network
Y. Ashida 89

Parallel computation in reflection seismology
T. Sato, T. Matsuoka and T. Tsuru 99

Resolution of time–frequency analysis for seismic crosshole measurements
A. Leśniak and H. Niitsuma 105

Detection of fault structure under a near-surface low velocity layer by seismic tomography: synthetics studies
T.A. Sanny and K. Sassa 117

Seismic traveltime tomography in anisotropic heterogeneous media
T. Watanabe, T. Hirai and K. Sassa 133

Relationship between ray distribution and reconstructed velocity image in reflection tomography
X. Chang 145

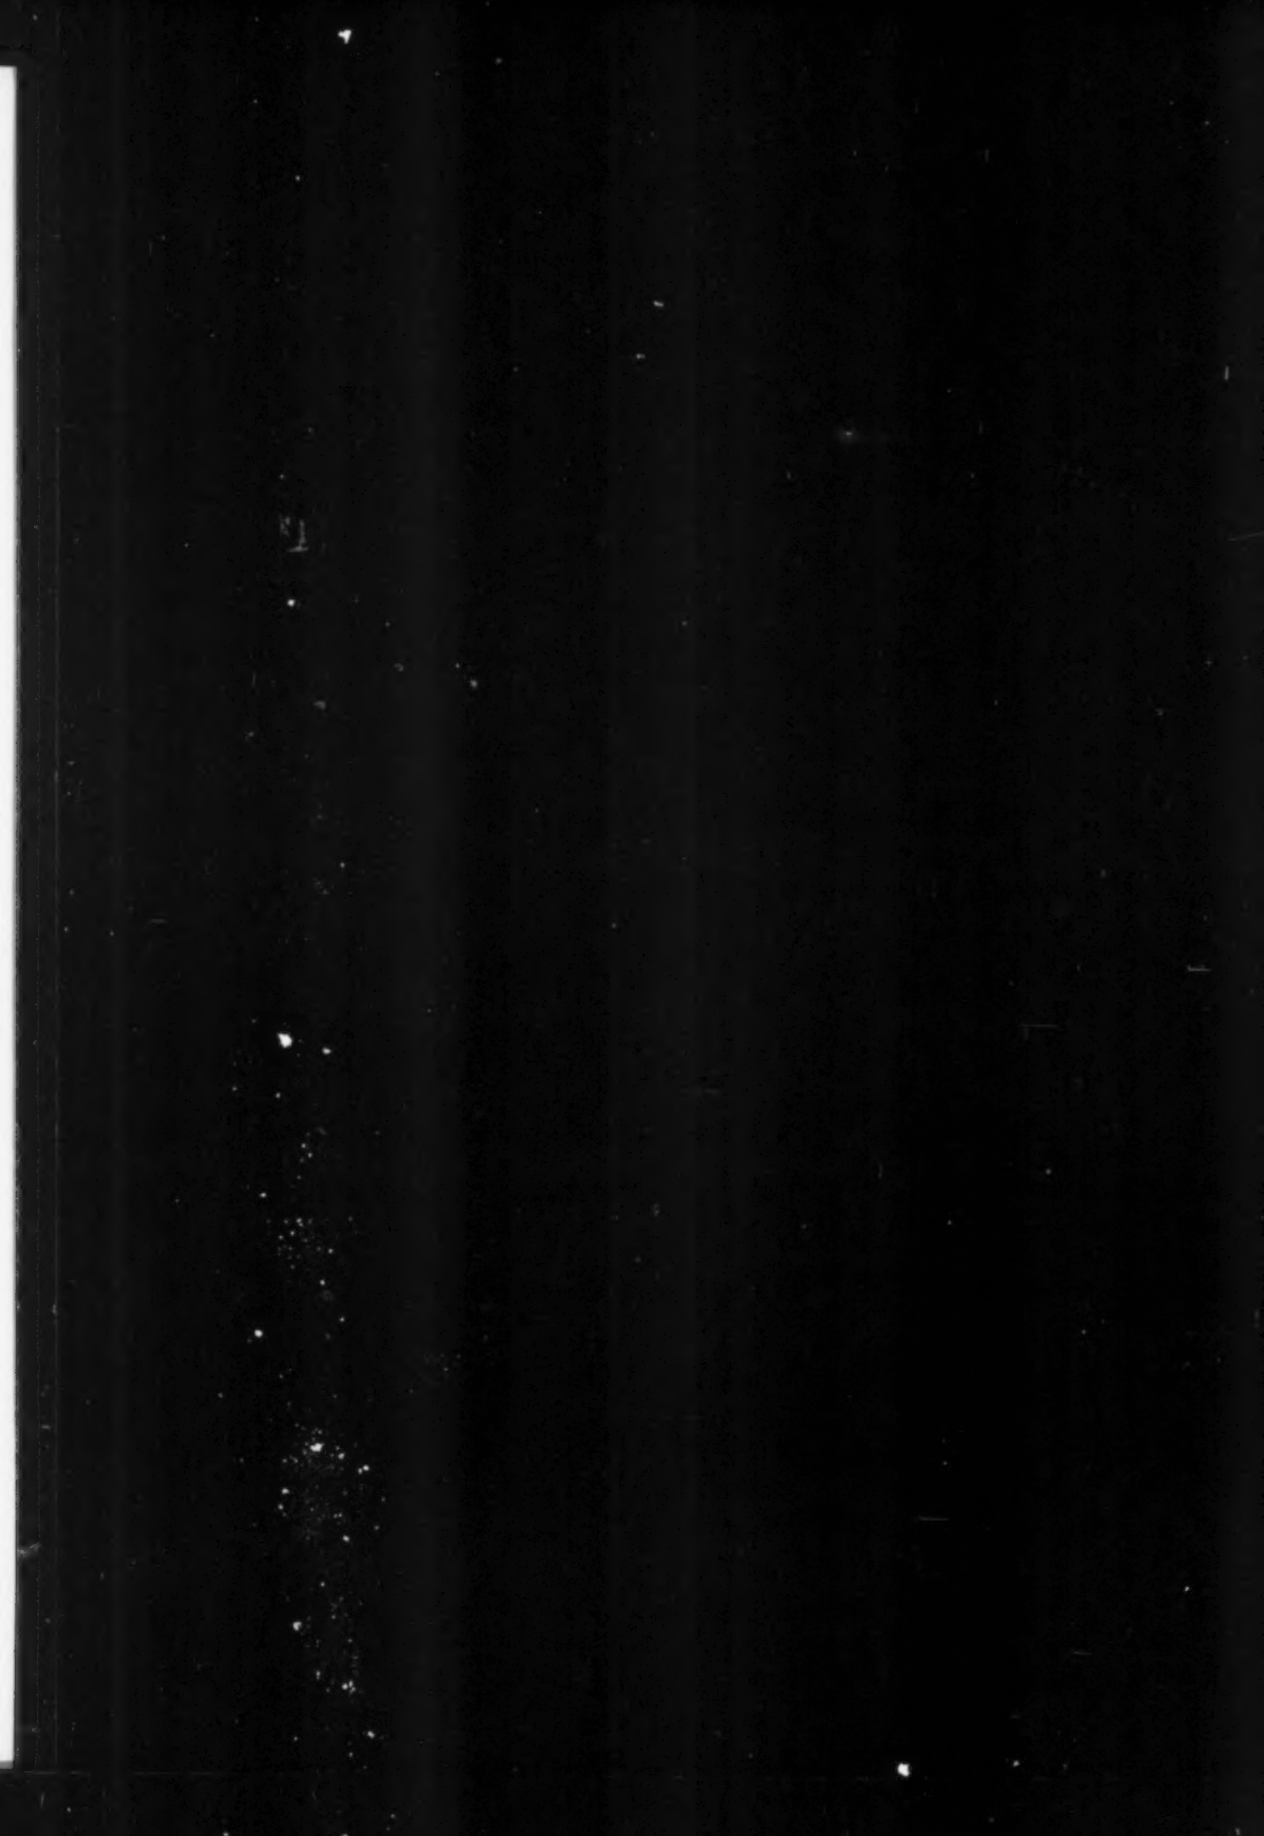
Seismic investigations for the final disposal of spent nuclear fuel in Finland
C. Cosma and P. Heikkinen 151

Reservoir fluid identification and elastic modulus determination using AVO
D. Santoso, S. Alam, L. Hendrajaya, Alfian, S. Munadi and \ Purwoko 159

Developments of non-contact data acquisition techniques in electrical and electromagnetic explorations
H. Shima, S. Sakashita and T. Kobayashi 167

Exploration of archaeological structures in deeper subsurface by means of directive antenna
Y. Kobayashi, K. Okamoto and M. Yoda 175

Three-dimensional modeling of magnetotelluric data using finite element method
T. Mogi 185

Development of the Vertical Electro Magnetic Profiling (VEMP) method
Y. Miura, K. Osato, S. Takasugi, H. Muraoka and K. Yasukawa 191
Conceptual design of an electromagnetic tomography system
S. Takasugi, Y. Miura and E. Arai 199
A new magnetotelluric inversion scheme using generalized RRI method
K. Yamane, S. Takasugi and K.H. Lee 209


Research Papers
Airborne geophysical prospecting for ultramafite associated talc, Altermark, northern Norway
T.A. Karlsen and O. Olesen 215
Lateral and topographic effects in geoelectric soundings
J. Pous, P. Queralt and R. Chavez 237
Electric–hydraulic conductivity correlation in fractured crystalline bedrock: Central Landfill, Rhode Island, USA
R.K. Frohlich, J.J. Fisher and E. Summerly 249
2.5-D Modeling in electromagnetic methods of geophysics
L.A. Tabarovsky, M.M. Goldman, M.B. Rabinovich and K.-M. Strack 261
